CLI Challenge Session

Challenges

1. Download Claude Code
2. Fork the Git repo:
   `https://github.com/aimathconference/cli-test-repo.git`
3. Create a file ‘`your_name.md`‘ with a short description of your interests (and maybe a potential problem?) in your fork
4. Use Claude Code to make a pull-request adding this file to the repo

CLI Challenge Session

Challenges

1. Download Claude Code
2. Fork the Git repo:
   `https://github.com/aimathconference/cli-test-repo.git`
3. Create a file ‘`your_name.md`‘ with a short description of your interests (and maybe a potential problem?) in your fork
4. Use Claude Code to make a pull-request adding this file to the repo

Bonus

1. Connect to port 3000 on the DGX Spark and query Open-WebUI
2. Create a python program that calls port 8000 on the DGX Spark
